

It's not enough to just be a great doctor anymore. In addition to your regular duties, now you must master the complex procedures that create revenue for your practice. MedEvolve has a devoted team of Revenue Cycle Management Experts who are ready to turn this costly chore into a streamlined, cash-generating boon.

Revenue Cycle Management

Results?

Your charges will see fewer days in A/R, decreased denials and reduced frustrations from playing games with payers. That means greater profitability and improved cash flow.

How can MedEvolve improve reimbursements?

By reviewing your policies and procedures at every step of the revenue production, billing and collection processes.

But insurance providers don't pay correctly?

We have seen it all, and know how to negotiate quickly and effectively with the payers.

How will I know I'm better off with MedEvolve?

We will measure the results and chart the trends for you. You'll see the improvements in revenue, cash flow and profitability.

What will it cost?

Less than the increase in new reimbursements received. We will produce a net positive cash flow for you.

What if I'm just now setting up my new practice (or office)?

MedEvolve has extensive experience in setting up new practices. Let us take the burden off your shoulders.

Do I have to sign a long-term contract?

No, but most practices do. They see results that can be achieved and sustained.

It's Time For Your Practice To Evolve

- Analysing fee schedules, coding practices and reimbursements
- Finding alternative revenue sources and overhead reductions
- Reviewing practice policies for HIPAA & OSHA compliance
- Assisting with leasing, credentialing & compensation policies.
